

## List of Graduation Theses of Biology Students

### Main Campus, Hawaiyah, Taif

### First semester 1439-1440H / 2018-2019G

<b>Course instructor</b>	<b>Title of the thesis</b>
Dr. Ahmed Hammad Nour Eldine	Survey of plant and insect nematode genera associated with some fruit trees in Taif Governorate
Dr. Ahmed Emam Dakrory	Sensitivity organs in vertebrates
Dr. Bender Maid Mokad Albogmi	A survey study on camel infestation with ticks in Taif Governorate
Dr. Tharwat Ghanem Abdel Qader	Organic decomposition
	Environmental pollution
Dr. Khaled Hassan Hussein Al Amer	Pomegranate plant
Dr. Mohammed Saleh Al-Malki	A field study on nesting behaviors in the Laughing dove in the city of Taif, Saudi Arabia
Dr. Imed ben Amer Al-Mabrouk	Cyst fibrosis inheritance
Dr. Abdelraouf Othman Hejab	Vitamin D
Dr. Mohamed Fadlallah Awad	Microflora in contaminated soil in car workshops in Taif
Dr. Yasmin Mohamed Shibani	Sclerosis: What are its symptoms? and how to treat it?
	Processed foods and their effect on human health
	Microbial diseases affecting the pregnant women
	Decomposed of organic wastes by microorganisms
Dr. Rania Salah El Din Rashwan	Predatory plants
Dr. Eman Fayad	Blood cancer
	Autism
	A study on autism in the Arab countries, especially Saudi Arabia
	Breast cancer
Dr. Lamia Abdel Hamid Ahmed	Bacteria that break down plastic
	A study on autism in the Arab countries, especially, Saudi Arabia
	A study on hematology in Saudi Arabia
Dr. Mervat Fathi Awad	Obsessive-compulsive disorder
	Peptic ulcer
	Myasthenia gravis
Dr. Aziza Hassan	Stem cell therapy is a promising treatment in the fields of regenerative medicine

Dr. Amani Gomaa Ibrahim	Microbial food contamination
	Neurological and psychological diseases
	Biological treatment of pesticides and studying their impact on the environment and human health
	Biofuels
Dr. Amal Mohamed Yacoub	Physical mental illness
	Study on some autoimmune diseases - multiple sclerosis
Dr. Fawzia bent Abdul Razzaq Al Salmi	Alzheimer's disease
Dr. Maha Abdelfattah Khalil	Medicinal plants present in the Kingdom of Saudi Arabia and their curative effects
	Bacterial diseases affecting the respiratory system and methods of treatment
Dr. Magda Mohamed El Mahdy	Parasites reproduced in fish
	The opposite effect of medicinal plant extracts on helminths
Dr. Amal Mohamed Borti	The most important date palm diseases in the Kingdom of Saudi Arabia and integrated control methods
Dr. Roaa Kamal Abdul Wahab	Stem cells and their applications in skin diseases
Dr. Jameela Saeed Al-Maliki	Chemical pesticides used in Taif farms and their impact on human health
Dr. Rasha Abdulrahman Ibrahim Al-Essa	Microbial and physiological diseases that affect plants and their treatment methods
Dr. Amal Mohamed Yacoub	Ebola virus
Dr. Sanaa Mohamed Fahmy	Study the effect of some aromatic oils on bacteria
	Effectiveness study of anti-microbial silver nanoparticles for bacterial infections Anti-microbial antibody for bacterial infections
	Antimicrobial activity of some medicinal plants and its effect on bacteria

**List of Graduation Theses of Biology Students**  
**Turabah University College, Turabah**  
**First semester 1439-1440H / 2018-2019G**

<b>Course instructor</b>	<b>Title of the thesis</b>
Dr Adel alkhadidi	A survey of bacterial pollutants in leafy vegetables
Hany Sabry Abd el raouf	Inventory and identification of some wild plants in the Turabah area
Dr Mohamed Nasan	Fiery blight in apples
	Bacterial vascular wilt
	Flower deformation in the mango
Dr Mohamed Soliman	Environmental pollutants and the risk of fatal diseases
	Causes, risks and prevention of diabetes
Dr Magdy Yassin	Mycoplasma in birds
	Research study on the presence of mycoplasma in the respiratory system of goats
Dr Esam Hasan Mohamed	Microbiological studies on samples of water collected from different sources
	The effect of lactobacilli on different types of bacteria
Dr Mohamed Salah Mohamed	Poisonous plants as insect repellent
	Leishmaniasis
	Common diseases between humans and animals (scabies disease)
Dr Arafat Abdel Hamed Abdel Latef	The effect of saline stress on some physiological activities of the plant
Dr Adel Merghany	Study the causes of vitamin D deficiency in the Turabah community
	Study the causes of infection by the parasites in the Kingdom of Saudi Arabia
	Determining the factors that contribute to kidney failure in Turabah Governorate
Dr Salama Mostafa	Bacteriological study on the chilled chicken
Dr Nada Ali Alqadri	Comparing the protein content in fresh milk from the soil region with canned and dried milk
Dr Sahar Abdelhadi Mohamed	The effect of environmental pollutants (acid rain, pesticides and radiation) on germination in legume
	The effect of age, smoking and obesity on the efficiency of vital systems in the body

**List of Graduation Theses of Biology Students**  
**Al-Khurmah University College, Al-Khurmah**  
**First semester 1439-1440H / 2018-2019G**

<b>Course instructor</b>	<b>Title of the thesis</b>
Dr. Gihan Farouk Ahmed	Antibiotic disaster
	Infectious diseases
	Breastfeeding
Dr. Umsalama Abdelmegeed Ahmed	Plant hormones and their effect on humans
	Soils of the Kingdom's lands and how to treat them
	Why do we sleep at night
	Gene therapy
	Agricultural soil treatment in the Kingdom

**List of Graduation Theses of Biology Students**  
**Main Campus, Hawaiyah, Taif**  
**Second semester 1439-1440H / 2018-2019G**

<b>Course instructor</b>	<b>Title of the thesis</b>
Dr. Ali Abdullah Majrashi	Growing weeds in some agricultural crops for four regions in Taif
Dr. Anwar Abdulkarim Kuhail	Effect of different levels of salt stress on the germination of corn seeds
Dr. Montaser Mohamed Sayed	Branchiopoda in Taif governorate
Dr. Ahmed Hammad Nouredine	The use of insect pathogenic nematodes in biological control of insect pests
	The biological control of <i>Gryllidae</i> (Night Cockroach), Taif Governorate
Dr. Eman Fayad	Diabetes mellites
	The Honey
	Aids
Dr. Yasmin Mohamed Shibani	Tourette syndrome: symptoms and methods of treatment
Dr. Jawaher Jahz Al-Bogami	Effect of <i>Linum usitatissimum</i> (flax- seeds) on breast cancer
	Effect of <i>Linum usitatissimum</i> (flax- seeds) on colon cancer
Dr. Hamida Hamdi Mohamed	Algae and its economic importance
Dr. Fawzia bent Abdul Razzaq Al Salmi	Medicinal plants for treatment of diabetes (lupine - prickly pear - marmarine thyme - cinnamon - turmeric)
	Medicinal plants for treatment of diabetes (black seed - ginger - pomegranate - fenugreek - bitter melon)
	Medicinal plants for treatment of diabetes (olives - ginger - turmeric onions - flaxseed - berries)
Dr. Reham Zakaria Mostafa	The effect of electromagnetic waves from mobile phones on some reproductive and physiological properties and the potential improvement role of some compounds
Dr. Magda Mohamed El Mahdy	Genetic modified crops
Dr. Nahed Ahmed Hussein	Cosmetic damage and risks
	Thalassemia, "anemia of the Mediterranean basin"
Dr. Hala Addel-Majeed	Genetic engineering in the agricultural field between benefits and harms
	Biotechnology applications in medicine and its role in human health care

	An analytical study on some processed foods and their effects on human health Genetic mutations in nucleic acids Environmental pollution (types, damages and causes)
Dr. Amani Gomaa Ibrahim	Genetic mutations in nucleic acids
	Environmental pollution (types, damages and causes)
Dr. Mervat Fathi Awad	Psoriasis
Dr. Rania Salah El Din Rashwan	The economic importance of <i>Gryllus bimaculatus</i> and the reasons for their spread in Taif Governorate
	The economic importance of some insect pests affecting grapes in Taif
Dr. Nashwa Abdel Salam Ezzedin	Food poisoning
Dr. Faiza Ahmed Almalki	A statistical and analytical study of diabetes
	Statistical and analytical study of blood pressure disease
Dr. Amal Mohamed Yacoub	Premature senility (progera)
	Fish parasites
	Oil pollution and its impact on living organisms
Dr. Manal Algami Benali	Autism
Dr. Amal Mohamed Borti	Pests infesting date palms in the Kingdom of Saudi Arabia
	The secrets of ocean life
	Species of extinct birds
Dr. Amal Hassan Moaz	Bleeding disease
	Alternative treatment methods
	Herbal medicine in the Kingdom

**List of Graduation Theses of Biology Students**  
**Turabah University College, Turabah**  
**Second semester 1439-1440H / 2018-2019G**

<b>Course instructor</b>	<b>Title of the thesis</b>
Dr. Arafat Abdel Hamed Abdel Latef	Plant vitamins
Dr. Omima Dahab Sayed	A project to study the risk factors for infectious diseases (Maltese fever) in Turabah Governorate
	A project to study the effect of smartphones on children's health in Turabah Governorate
Dr. Nada Ali Alqadri	Effect of grape seed extract on bacteria
	Determination of the isolated bacterial pollutant from the restaurants and hospitals of the Governorate of Turabah and the laboratories of the University College of Turabah
Dr. Sahr Abdelhadi Mohamed	Comparing the protein content in fresh milk from the Turabah region with canned and dried milk
	The effect of environmental pollutants (acid rain, pesticides and radiation) on germination in legumes
	The effect of age, smoking and obesity on the efficiency of vital systems in the body
